Pitman Typing Tutor, is a versatile keyboard course with a new approach designed for anyone who wants to learn to type quickly and efficiently. It is superbly flexible and can be used by complete beginners or as a refresher course for those who want to improve their skills.

It is easy and fun to use, and comes without any tiresome documentation to read — the program contains full instructions and teaches you how to work through the course and you familiarise yourself with the keyboard right from the start.

There are two type of exercise — fingering drills followed by sentence practice — which cover all the keys thoroughly. A screen display of the whole keyboard helps you to drill correct fingering.

You can work entirely at your own pace and can access or escape from any drill or exercise at any time.

Optional extra work practice is provided which is tailored to solve your own individual problems.
